

Prescription Orthotics

Each foot is made up of 28 bones, 30 joints, and more than 100 muscles. The unique way these **synchronize & absorb contact** from the ground determines the balance and mobility of our entire lower body.

On average, we take over **2.5 million steps per year**. Every step out of biomechanical alignment can cause and compound health issues.

will experience foot pain at some point in their life

of Canadians own at least one pair of custom orthotics

of the population have "optimal" foot biomechanics

91% of Canadians reported pain reduction after six weeks of wearing custom orthotics
